MOVING UPWARDS

 Alla fine degli anni '70 **Manzelli**, realtà stimata nel settore delle forniture industriali per il marmo già dagli anni '50, diede inizio alla produzione delle prime ventose per il sollevamento ad aria compressa.

Oggi, grazie all'esperienza acquisita e interpretando le esigenze dei clienti, **Manzelli** è riconosciuta come azienda leader nella progettazione di apparecchiature per il sollevamento. Il brand **Manzelli** viene infatti apprezzato sui mercati internazionali per il suo inconfondibile *Made in Italy* e per l'accattivante *design*, che lo rendono il più apprezzato dagli operatori di settore.

L'offerta di apparecchiature **Manzelli** abbraccia i più svariati settori: marmo, vetro, metallo, lamiera, legno e packaging.

Negli ultimi anni di crescita aziendale, grazie alla maggiore presenza sui mercati internazionali e stimolati ad arricchire la nostra offerta, **Liftstyle** ha introdotto due nuove linee di prodotto:

Atmosphere - Air purification systems

Terra - Water purification systems

La nostra filosofia aziendale stimola la ricerca a elevare la qualità del prodotto, rafforzando la nostra *mission* nel perseguire valide soluzioni tecniche, rivolte alla sicurezza delle persone che ci scelgono come loro partner.

 Esteemed reality in the marble industry from the '50, **Manzelli** started the production of air powered vacuum lifters at the end of the '70.

*Thanks to the long experience and the requests received from key clients through the years, **Manzelli** is a recognized leading brand in the manufacture of lifting equipment. The brand is appreciated worldwide for its unique **Made in Italy** style and its attractive **design**, which make the **Manzellis** the most appreciated lifters in the stone sector.*

The product range includes many industries: stone, glass, metal, wood and packaging.

*During the years, **Liftstyle** has become even more competitive on the international markets. This credit encouraged us to increase our offer; therefore we introduced two new product lines:*

Atmosphere - Air purification systems

Terra - Water purification systems

*Our corporate philosophy drives us to constant research for the improvement of our quality, and it fortifies our **mission** of enhancing our technical solutions, aimed at the safety of those who choose Liftstyle as their partner.*

**QUALITY, SAFETY, PERFORMANCE:
MINIMUM EFFORT FOR MAXIMUM RESULTS**

Our Elektra lifters for your powerful production.

Electric pump on board and you only need to connect.

High resistance machines to work safely at the open-air.

- Funzionante con pompa elettrica del vuoto a bordo, completa di quadro elettrico e vacuostato
- Capacità 3mc/h
- **Disponibile con tensione:**
 - 230V monofase 50/60 Hz
 - 400V trifase 50/60 Hz
 - 12V DC per l'utilizzo su macchine operatrici semoventi
- Portata uguale in posizione orizzontale e verticale
- Struttura in acciaio saldata con certificazione EN ISO 9606 - 1:2013
- Piastre e contropiastre in acciaio inox
- Supporti piastra con attacco rapido
- Attacco e stacco delle piastre per mezzo di valvola a corsoio in alluminio anodizzato con blocco in posizione di presa
- Vuotometro in acciaio inox e in bagno di glicerina; la scala colorata facilita il controllo del grado di vuoto in posizione di presa
- Serbatoio di riserva vuoto in alluminio
- **Ribaltamento manuale o elettrico da 0° a 90°**
- Allarme acustico e luminoso autonomo, con pannelli solari e completo di caricabatteria (lampeggia e suona se il grado di vuoto non è sufficiente per il sollevamento)
- **POMPE ELETTRICHE DEL VUOTO INDIPENDENTI per materiali difettosi e porosi**

- *Powered by electric vacuum pump on board, complete with switch panel and vacuostat device*
- *Capacity 3 mc/h*
- **Available with tension:**
 - *230V single-phase 50/60 Hz*
 - *400V three-phase 50/60 Hz*
 - *12V DC (to allow the use with self-propelled machinery)*
- *Same capacity in horizontal and vertical position*
- *Steel structure, welded and certified EN ISO 9606 - 1:2013*
- *Suction plates and backing plates made of stainless steel*
- *Supports with rapid attack*
- *Connection and disconnection of the plates by means of slider valve made of anodized aluminium; it locks when in connect mode*
- *Vacuum gauge made of stainless steel and dipped in glycerine; the coloured scale facilitates the control of the vacuum level when in connect mode*
- *Vacuum reserve tank made of aluminium*
- **Manual or electric tilt from 0° to 90°**
- *Self-governing luminous/acoustic alarm system with solar panels and complete with battery charger (it flashes and rings if the vacuum level is not sufficient for the lifting process)*
- **INDEPENDENT ELECTRIC VACUUM PUMPS for flawed and porous materials**
